100 Rasco Handlers Installed in Thailand

Thailand marks the cornerstones of Rasco's Handler shipments. Handler #1 was shipped to Thailand and Handler #100 was now shipped to the same customer in Thailand so that Rasco has now reached an installed base of 100 handlers in this country.

Rasco started its business in Thailand when shipping the first SO1000 Handler in 1997.

Up to now Rasco has built up a wide customer base in Thailand for its complete product platform, so that the hundredth handler could be shipped to a Thai key customer last month.

With a worldwide installed base of more than 1000 handling systems Rasco has gained a remarkable market share in the package handling equipment market.
